SRI B D TATTI (ANNAWARU) MEMORIAL CHARITABLE TRUST

Empowering people with disabilities by

Creating Opportunities...

ANNUAL REPORT 2025-26

SHREEMAN B D TATTI

(ANNAWARU)

MESSAGE FROM THE
MANAGING TRUSTEE

The year 2025–2026 has been a year of meaningful progress, new milestones, and renewed commitment for Sri B. D. Tatti (Annawaru) Memorial Charitable Trust. As I reflect on our journey, I feel proud of our collective achievements and grateful to everyone who continues to believe in our mission of creating an inclusive society for children and persons with disabilities.

Our journey has always been guided by the belief that every child deserves an opportunity to learn, grow, communicate, and live with dignity, irrespective of their disability or circumstances. During this year, we continued strengthening our work in early intervention, early education, rehabilitation, community awareness, and livelihood development across North Karnataka.

A significant achievement was the Ek Prayas Early Intervention and Outreach Programme, which reached 298 children with developmental delays and disabilities through centre-based interventions, home visits, therapy services, parent guidance, and community outreach. I sincerely acknowledge the Azim Premji Foundation for its valuable support in strengthening early intervention and early education services at our Laxmeshwar and Ron centres. The establishment of a new Ek Prayas Centre at Kundgol, extending our services to another district, was another important milestone in bringing essential services closer to children and families.

Our community initiatives, in collaboration with Anganwadi workers, ASHA workers, healthcare professionals, schools, and government departments, continued to promote early identification, disability awareness, and access to services. Through the Garva Se Livelihood Programme, we also supported parents of children with disabilities through tailoring and jute bag production, creating opportunities for skill development, income generation, and financial independence.

Education and rehabilitation remain at the heart of our mission. Our residential school for children with hearing impairment and Sushravya Pre-Primary School for Oral Deaf Education continue to support children's communication, speech, language, academic, and social development through the dedicated efforts of our teachers and professionals.

We are proud that the Trust received the Best Social Entrepreneur Impact Award from IDFC FIRST Bank and NDTV recognising our contribution to the disability sector. This achievement belongs to our entire team and everyone who has supported our mission.

As a leader, I believe that an organisation's true growth is reflected not only in the number of beneficiaries it reaches but also in the lives it transforms, the people it empowers, and the systems it builds for the future. Moving forward, we remain committed to improving the quality of our services, strengthening our team and institutional systems, building sustainable partnerships, and nurturing the next generation of leadership to carry our mission forward.

I extend my heartfelt gratitude to our donors, corporate partners, particularly IDFC FIRST Bank and Azim Premji Foundation, government departments, Board members, parents, well-wishers, community members, and our dedicated staff. Your continued trust and encouragement give us the strength to move ahead.

Warm Regards,

Somanath Mahajanashettar
Managing Trustee

ABOUT US

Founded in 1994, Sri B D Tatti (Annawaru) Memorial Charitable Trust is located in Laxmeshwar, Gadag District, Karnataka. It was established by a group of socially-conscious individuals who sought to bring about a positive change in society. With a team of 62 dedicated members, the Trust has been a beacon of hope for children and adults with speech, hearing impairments, and other disabilities.

Over the years, the Trust has rapidly expanded its services and now reaches persons with disabilities, including children, youth, and adults, in 11 districts of North Karnataka. The Trust operates three community centers in Gadag District focused on early intervention and early education, along with programs such as the Ek Prayas Centre and the Ek Prayas Livelihood Centre for ID Autism Mothers.

Today, the Trust is the only NGO in North Karnataka offering a range of specialized services, including:

- Smart classrooms for all speech and hearing-impaired students.
- Audiology room for hearing assessments and testing.
- STEM lab to foster learning through technology.
- Mother Care Centre, which provides speech therapy for deaf children.
- GarvSe Livelihood Support Centre, offering livelihood opportunities for persons with disabilities (PwDs).

OBJECTIVES

- To ensure early identification of children with disability, assess their needs, and accordingly facilitate the process to provide them with the relevant service.
- To prepare children with disability to mainstream in regular Educational institutions.
- To identify youth and adults with disability, and assess their needs.
- To Support youth with disability to pursue higher education, facilitate or provide vocational training, and income generation opportunities through placement or self- employment.
- To provide appropriate mobility aids and appliances to the needy.
- To promote and establish networks to assist persons with disability at the family, institution and community level.
- To provide therapy services (physiotherapy and speech therapy) to persons with disability.
- To create a technology friendly environment to the disabled community.

VISION

Enabling, Engaging and Enriching the community as a society of equals by creating opportunities for inclusion of persons with disability.

MISSION

- Driving comprehensive inclusion of persons with disability in all the spheres of life starting from their families to society at large.
- Promoting and Protecting the rights of person with disabilities and their families.
- Creating opportunities to lead a sustainable and respectful life and be a meaningful contributor to the society.

KEY PROGRAMMES

Institution Based Rehabilitation program

- Sushravya Pre-Primary School for Oral Deaf Education
- Sri B D Tatti Residential School for the hearing impaired

Community Based Rehabilitation Program

- EK Prayas
- EK Prayas Livelihood Centre
- Garv Se Livelihood

INSTITUTIONAL BASED PROGRAMMES

Established in 2007-08, our center is the only one in North Karnataka offering specialized Speech Therapy training for hearing-impaired children and their mothers. We enroll children as young as six months up to eight years old, requiring both the child and mother to stay at the school for three years for comprehensive training. This immersive experience invigorates the children and instills positive energy and confidence in both the mothers and their children, fostering a supportive and nurturing environment for their development.

FACILITIES AND SERVICES AT SUSHARAVYA

- Residential facilities for mother and child.
- Auditory training.
- Hearing testing.
- Oral deaf education training due to which children are able to talk the important basic words, communicate and understand most daily-use words. These include names of vegetables, flowers, names of festivals, music instruments; identifying the source of sound during experiments etc.

During the year, a total of 19 children (10 were boys and 9 were girls) studied in the course. Till date about 115 children have passed out from Susharavya pre-primary and mainstreamed in schools.

SRI B D TATTI RESIDENTIAL SCHOOL FOR CHILDREN WITH HEARING IMPAIRMENT

This program is the dream project of our Chairman and Hon. Secretary of the organization. It started with only 10 students and has now grown to 165 students with hearing impairment. The program provides a safe and supportive learning environment with proper classrooms and the required facilities for each class. We use total communication methods to help deaf students understand lessons and concepts more clearly. The use of technology, smart learning methods, and science lab facilities makes learning more interesting and meaningful for the students. The program also focuses on early identification of hearing impairment, proper hearing aid programming, auditory-verbal therapy, and regular monitoring of students' speech and language development. These efforts help students improve their communication skills and support their overall educational development.

- The program focuses on improving the listening, speech, and language skills of children with hearing impairment. Early hearing assessments, regular hearing tests, hearing aid checks, proper hearing aid programming, and auditory-verbal therapy are provided based on the individual needs of each child.
- The program also aims to identify children with hearing difficulties at the community level. Awareness camps, screening programs, open days, and referrals are conducted to identify hearing problems at an early stage and connect children with the required support and services.
- Another important focus is to improve the educational performance of the students. Children are supported in language learning, functional English, science, mathematics, and technology. Smart classrooms, audio-visual materials, and science lab activities are used to make learning easier, practical, and more interesting.
- The program also gives importance to the development of teachers. Regular training and guidance are provided to help teachers use smart classroom technology, audio-visual materials, and science lab equipment effectively. This helps create a better learning environment and supports the overall development of the students.

ACADEMIC ACHIEVEMENTS

Sri B.D. Tatti (A) Memorial Charitable Trust Residential School for Hearing Impaired, Laxmeshwar, recorded an overall pass rate of 92.59% in the 2026 SSLC examinations.

AMONG THE TOP ACHIEVERS

- Sudha Totad secured 1 st rank in the school with 311 marks (73.18%).
- Laxmi Gunjala achieved 2 nd rank with 308 marks (72.47%).
- Harshita Karibasannanavar claimed 3 rd rank with 306 marks (72%).
- J. Karthik earned 4 th rank with 299 marks (70.35%).

Out of the 27 students who appeared for the exams, 16 passed with first class, 6 with second class, and 3 with third class. The school management, trustees, administrator, headmaster, and staff extended their warm congratulations to all the students for bringing pride to the institution.

COMMUNITY BASED REHABILITATION PROGRAM (CBR)

- **Ek Prayas**

Sri B D Tatti (Annawaru) Memorial Charitable Trust, in collaboration with IDFC FIRST Bank, has launched a specialized Early Intervention and Primary Intervention in the year 2020-2021 Program designed to support children with delayed development, including those with intellectual disabilities (ID), autism & other developmental delays. This program specifically targets children aged 2-12 years and provides a combination of community based & center-based rehabilitation services.

KEY FEATURES OF THE PROGRAM

- **Target Group**

This program is designed for children aged 0-12 years who have been identified with developmental delays or disabilities, including intellectual disabilities (ID), autism, and other conditions. The initiative is especially effective for children who are detected early, allowing them to benefit from timely and appropriate interventions.

- **Early Identification and Screening**

Early identification is a crucial component of the program. Screening is carried out in local communities by Anganwadi and Asha workers to identify children who may exhibit developmental delays or disabilities. Once identified, a detailed assessment is conducted based on the child's case history, and parents are counseled to guide them in the next steps.

- **Early Identification and Screening**

After the screening, children undergo a thorough assessment to create a customized rehabilitation plan. Parents receive counseling, helping them understand their child's condition, the available therapies, and how they can best support their child's development. This empowers families to make informed decisions about their child's care and progress.

- **Admission to Ek Prayas Centre for Rehabilitation Therapy**

Children who are identified and assessed are admitted to the Ek Prayas Centre, where they receive specialized rehabilitation therapies, including speech therapy, occupational therapy, behavioral therapy, and other necessary interventions. Ongoing follow-up ensures that the child's progress is regularly monitored and adjustments are made to the rehabilitation plan as needed.

- **Early Identification and Screening**

The Early Education program provides children with essential daily living skills, including disability management, communication, and self-care. In addition to basic education, the program focuses on preparing children for integration into mainstream education when possible. It also addresses the needs of children who have been left out or are struggling in traditional educational settings.

- **Awareness of Government Schemes**

As part of the program, families are educated about various government schemes and initiatives available for children with disabilities. This ensures that parents are aware of and can access the financial and support resources available to their children.

- **Community-Based Support**

This program provides rehabilitation and education services both in the community and at the Ek Prayas Centre, ensuring that children receive continuous care. Community-based interventions promote inclusion, helping children thrive in their local environments while accessing the necessary rehabilitation services.

SUCCESS STORY

SANVI CHANDRASHEKAR SAGAR

Executive Summary

Sanvi Chandrashekar Sagar, born on 27 November 2019, is from Mallasamudra, Gadag. She joined the EK Prayas Program at the age of 2 years and 12 months and was diagnosed with Intellectual Disability. Her father works as a Staff Nurse at GIMS Hospital, Gadag, and her mother is a homemaker. Through regular intervention, therapy, parent involvement, and follow-up, Sanvi has shown meaningful progress in her overall development.

Challenges at the Beginning

When Sanvi joined the program, she required support in movement, communication, feeding, self- care, social interaction, & cognitive activities. She had difficulty walking independently, expressing her needs, performing daily activities, and interacting with others.

Intervention and Support Provided

The EK Prayas team provided individualised intervention, therapy, skill-building activities, parent guidance, and regular follow-up according to her needs. Her parents were also guided to continue activities at home, which helped her practise and strengthen the skills learned at the centre.

Progress and Achievements

- Physical and Motor Skills: Improved mobility and coordination; can jump in place, kick a large ball, and build structures using blocks independently.

  Self-Help Skills: Can eat and drink independently, brush her teeth, maintain personal hygiene, and remove simple clothes with less support.
- Communication: Can produce animal sounds, identify 10 body parts, and use expressions such as "Please," "Namaste," and "Bye Bye."
- Social Skills: Participates in group activities, follows game rules, and interacts more comfortably with others.
- Cognitive Skills: Can independently match three colours and copy a circle and draw vertical lines with verbal guidance.

Impact of the Program

Sanvi's progress shows the importance of early intervention, regular practice, family involvement, and individualised support. Her improved communication, self-care, social participation, and motor skills have increased her confidence and reduced her dependence on others in everyday activities.

Conclusion

Sanvi continues to receive support to strengthen her communication, independence, social participation, and functional skills. Her journey is an encouraging example of how timely and continuous intervention can help children with disabilities develop greater confidence and independence.

EK PRAYAS LIVELIHOOD CENTER

With the support of IDFC FIRST Bank, Sri B D Tatti (Annawaru) Memorial Charitable Trust has successfully launched a Jute Bag Production Program at the Ek Prayas Centre. This initiative aims to empower and create livelihood opportunities for the mothers of children with intellectual disabilities (ID) and autism, providing them with skills and a sustainable source of income and make the Mother Empower.

GARVSE LIVELIHOOD CENTER

GarvSe livelihood center is a nodal center which strengthens the livelihood ecosystem of PWD through collaborating with stakeholders such as local Government, NGOs, Educational institutions, Skilling Partners, Volunteers, Parents of PwD, Employers, and any other relavant stakeholders to leverage their expertise and support for providing livelihood opportunities for PwD in the region with the support of Enable India Bangalore.

Enable India has embarked upon an outreach plan to strengthen livelihood ecosystem for PwD at various villages, Town, and cities across the country. These livelihood ecosystems will be built and driven by GarveSe Centers which will be the nodal center in the region to connect and work with all the stakeholders of PWD.

- **Impact so Far**

- 4750 hearing-impaired students from 11 districts are provided residential education.
- 210 oral deaf children have been mainstreamed to normal school.
- 1900 children with disabilities helped through early intervention and early education.
- 3020 people with disabilities reached through livelihood programs.
- Awareness to different 1000 stakeholders in the Gadag district.
- Primary intervention was provided to 298 children with Intellectual Disabilities and Autism between the ages of 1 to 12 years.
- 650 mobility aids provided to children with disabilities.
